2506/201 AIRCRAFT PROPELLER SYSTEMS June/July 2019 Time: 3 hours

THE KENYA NATIONAL EXAMINATIONS COUNCIL

DIPLOMA IN AERONAUTICAL ENGINEERING (AIRFRAME AND ENGINES OPTION)

MODULE II

AIRCRAFT PROPELLER SYSTEMS

3 hours

INSTRUCTIONS TO CANDIDATES

You should have the following for this examination:

Answer booklet:

Drawing instruments;

Mathematical tables/ Non-programmable scientific calculator.

This paper consists of EIGHT questions.

Answer FIVE questions in the answer booklet provided.

Maximum marks for each part of a question are as indicated.

Candidates should answer the questions in English.

This paper consists of 2 printed pages.

Candidates should check the question paper to ascertain that both pages are printed as indicated and that no questions are missing.

	X.	(a)	Explain why blade tip speed is considered during propeller blade design.	(9 marks)
		(b)	Describe the operation of a variable pitch propeller.	(11 marks)
	2.	(a) (a)	Highlight the procedure of fitting a single blade on a fixed pitch propeller.	(16 marks)
		(b)	Highlight four ground tests carried out on a propeller system following a change.	component (4 marks)
	3.	(a)	With reference to wooden propellers blade construction:	
			(i) state four materials used; (ii) describe the construction process.	(15 marks)
		(b)	Describe the construction of aircraft metal propellers.	(5 marks)
	4.	With the aid of a labelled sketch, describe a typical electrical anti-icing system for aircraft		
/		propel	ler blades.	(20 marks)
	5.	(a)	Explain the function of a propeller control unit.	(2 marks)
		(6)	With the aid of a labelled diagram, describe the four main assemblies of an	engine
			driven propeller control unit.	(18 marks)
	6.	With t	he aid of labelled sketches, describe the construction and operation of an ele	
		proper	ler torque meter.	(20 marks)
	7.	In accordance with the J.A.R'S, explain each of the following guidelines with response metallic propeller materials and processes:		ect to
200		(a)	selection;	(6 marks)
		(b)	material specifications;	(3 marks)
		(c)	design values;	(2 marks)
		(d)	process specifications;	(3 marks)
		(e)	special manufacturing methods.	(6 marks)
۸۰ اردر آ	8.	8. (a) With the aid of labelled sketches, describe the blade repair limitations for following:		
ton			(i) face and camber repairs;	(9 marks)
Tile to	M		(ii) leading and trailing ledge repairs.	(9 marks)
The state of the s	100 mg	(b)	State four contents of a blade minor kit used in line maintenance.	(2 marks)
