Answer Question 1 and any other 3 questions

Question 1- COMPULSORY

Health awareness plays a greater role in health promotion and sustainability of livelihoods. Public health has a history of concern with environmental factors, particularly in relation to the provision of clean air and water, and uncontaminated environments. Since the late twentieth century, health program planners have worked with the concept of determinants of health and the value of community connection, and started to explore the role of nature in mental health, the importance of livable communities and active transport for promoting health, and the interconnection of ecosystems and health. It is notable that dynamics in the health sector and constant and some communities are ignorant of the facts. Cases such as communicable diseases are for instance alarming in Kenya and less or no attention is paid to the worrying trends. As a result:

- a) Explain ways of promoting health awareness (8 marks)
- b) Discuss the common diseases that affect populations in Kenya (9 marks)
- c) Citing relevant examples discussed in class, describe public health functions in Kenya (8 marks)

Question 2

Disease occurrence and widespread has become a major challenge to the public health department. Today, there are some diseases, which their causes are unknown. Using relevant examples,

- a) Explain ways in which diseases can be classified (8 marks)
- b) Discuss disease prevention methods (7 marks)

Question 3

Human hygiene in personal and social aspects of life is one of the most important practice that cannot be underestimated. In relevance to personal hygiene, answer the following questions

- a) What is the easiest way to prevent catching the flu?
- b) A single cough can contain thousands of bacteria and viruses. What can you do to stop the spread at the source?
- c) What the minimum amount is of times a day should you brush your teeth?
- d) Besides washing and scrubbing your feet every day. What else should you do for proper foot hygiene?
- e) What is the most important thing to do to your hair every day?
- f) How do you get bad odors off your body?
- g) Give 3 examples of when to wash your hands.
- h) What should you put on before going out on a hot, sunny day?
- i) Name one disease caused by bacteria.
- j) True or False: Water is the most important thing for personal hygiene.

15 (Mks)
